Ship By: Tax #: ST3 ON FILE 9:43:47 PRT: 6

Tax	D	Qty	Description	Price	Amount
			Service call to location, engine died and will not restart (inj. pump?) - Service call to location, checked engine for noise, start up, has bad internal problem, so picked up and hauled into shop, drained oil, removed the pan, #4 piston was broken up, so split the tractor, drained coolant, removed the head, removed all sleeves and pstones, the crankshaft was ok, checked cam, tappets need to be replaced, cam ok, customer said to overhaul the tractor, sent the head to Arnold Motors to have rebuilt, cleaned up block and crankshaft, removed rear engine plate and replaced the gasket & cam seal, reinstalled the plate, installed new rear crank seal, had flywheel resurfaced, installed with Reman clutch disc and pressure plate, new pilot and release bearings, removed the cab mounting plate to get the clutch shaft out to get the IPTO gear out, new seals and o-rings, installed it, installed new sleeves and pistons, new standard rod bearings and replaced mains with new standard ones as well. Installed Reman engine oil pump, new front seal kit & wear sleeve, installed head gasket and cylinder head, new tappets, torqued head bolts, set valve lash, new thermostat, radiator hoses, and fan belt, new air filters, new oil filters and 16 quarts of 15w-40 oil, install new fuel filters, installed Reman injection pump, 6 reman injectors, #4 injection line due to threads stripped out, replaced water filter and new coolant, engine fan was on backwards, so switched it. The MCV valve had some leaks on it, replaced o-rings on TA spool and clutch dump valve, has a aftermarket kit on, so matched up orings on the spool block, installed oring and boot kit on clutch booster, assembled, installed, and adjusted, replaced pedal spring that was broken, installed cab bracket. The water temp sender broke off, so removed the side panels, replaced the gauge cluster with a new one, hooked up and got all dash bulbs working, tightened shift lever up and greased lever, installed panels, pumped fuel back in, removed tank heater, it was not plumbed right, installed block heater and hooked up heater hoses the right way, installed new shutoff valve. Checked hyd oil level, added 16 quarts of Hytran, adjusted trans brake and lube light, put on dyno and break in engine, HP @ 100hp, water temp was good and did not run hot, installed hoods and washed off.
