and cleaned shaft up. Installed new seal cup and seal. Installed roller back on shaft and tightened. Installed new O-ring and put cover back on. Filled with new oil.
Took the cover off the right hand armrest to see what was making the MFH not move full range. Found that the bottom of the handle had come loose. Took it all apart and replaced the shaft and the tension spring. Put back together with new bolts. Reset the sensor and neutral switch. Reinstalled the armrest into the combine and hooked all wires back up. Checked to make sure had full range and did a calibration on MFH.
Removed the old precleaner rod. Installed new rod and all new hardware. Installed on combine and tightened the jam nuts. Set the sieve to spec.
Removed tension from the engine fan pulley. Found that the tensioner arm had broke off. Removed the belts and engine fan. Removed bolts from tensioner Bracket one of the allen bolts striped out had to weld nut to it and finally got it. Removed the bracket and took tensioner arm and moved it to the new bracket. Removed the fan pulley and put on the new bracket. Installed the new bracket on the engine and tightened to spec. Installed new air screen drive belt. Installed the two fan drive belts. Installed the fan blade and tightened all bolts to spec. Tensioned the belts.
Took clean grain elevator chain apart. Removed the elevator boot and took clean grain auger out. Removed the tailings auger. Found that the tailing transition cone was shot and the flange behind it was broken. Cut the bad parts out and welded new flange in and welded new flat piece and cut bolt hole in. Installed new cone. Installed liners in both clean

and tailings auger troughs. Welded the bottom of both liners and riveted around the top of both. Welded the panels to both covers. Installed clean grain auger back into the combine and put new bearings on both sides. set each bearing and set the screws. Installed new elevator boot and reconnected the elevator chain. Turned the clean grain auger a couple of times to make sure the clearance was right with the liners and cover. Installed the tailing auger and put bearing back on. Spun over couple of times to check its clearance. Tightened the tailings processor back up after installing the cone. Installed the shaker drive belt back on and tailings belt back on. Installed new tailings processor cover. Ran machine to check everything.
