COMPLAINT:
replace injectors

CORRECTION:
Foster

Brought into shop, tipped hood forward into the service position, blew off all the dirt and debris around the valve cover. Removed the valve cover and drained engine coolant. Removed the rocker arm assemblies, valve bridges and push rods. Removed the injectors and injector sleeves. Cleaned up the injector sleeve bores in the cylinder head. Installed new injector sleeves and swedged them. Installed new injectors, reassembled all valve bridges, push rods and rocker arm assemblies. Adjusted the valve clearance and injector preload. Put the new injector calibration data in the ECU. Dumped coolant back into tractor and test ran. Checked for leaks and washed off area that was worked on. Topped off coolant level after engine was ran to operating temperature.
