Description of work					Hrs	Mins
- Took grill all apart while coolant drained. Took Air to Air off, and pulled coolant reservoir off. Used service truck to pull radiator out after it was unbolted. Took the fan off then removed fan clutch and both belts. - Put new belts on and new fan clutch assembly. Pulled out old radiator support brackets and transferred parts over to new radiator. Dropped new radiator back in and started putting everything back together. Ran truck for 30 minutes and topped off fluids.					9
