SEGMENT# 1 S SC042 NA 10/23/24 10/23/24
155917 FIRE IN UNIT
In shop repair: The dropped off unit will not run. The customer wanted their attachment. Had to open hydraulic lines to relieve hydraulic pressure to get quick attach cylinder pins to release. Pins still will not release. Use two lift trucks to hold cutter head up and pound quick pins upward to get them to release. Loaded cutter head on to customer's trailer. Pick up the unit and get to work area. Remove the engine then steam clean truck and engine. Remove all steel lines and hoses to remove hydraulic tank for replacement Steam clean truck again and start to reassemble tank for installation Install hydraulic tank and start to reassemble truck found a bad steel tube had to stop and order new pipe Work on reassembling truck Finished hooking up all hydraulic lines and install Def system. Replaced starter, cables, harness and sensors. Soak manifold bolts in penetrating oil. Separate and remove turbo and throttle body and install of new. Removal of hydraulic pump and injection pump. Assemble engine fuel rail line, new motor mounts, heat hose and steel lines. Install the engine into unit. Reassembling truck Install body covers and run wires for hood than finished install of roll bars and test drive.
